1. Executive Summary

The Refex Group intends to implement the Expense Management System to streamline and automate workforce expense processes. This System will replace manual and fragmented expense handling with a centralised, integrated, and user-friendly system. This will improve accuracy, compliance, efficiency, and employee experience across all expense-related activities.

2. Business Objectives

- Establish a centralised platform for workforce expense management.
- Automate workflows for Travel & Accommodation requests, advances, claims, and approvals.
- Integrate with Zuna and E-Travel systems for seamless data flow.
- Ensure compliance with organisational policies and regulatory requirements.
- Enhance transparency, reduce errors, and provide real-time expense insights.

3. Business Needs

Currently, expense and travel management are handled manually through Gmail and spreadsheets. This approach results in:

- Time-consuming request tracking and approval cycles
- Errors due to the absence of a centralized system of record
- Redundant manual data entry caused by dependency on external systems.

The proposed system will address these challenges by:

- Automating expense and travel request submission, approval workflows, and notifications
- Providing a centralized repository for all expense and travel transactions
- Enabling configurable expense and travel reports for workforce monitoring, governance, and informed decision-making.

4. Scope

- Implementation of Refex Expense Management System
- Workflow configuration for Travel / Accommodation bookings, reimbursements, claims, advances
- Integration with Zuna and E-Travel
- Workforce Expense Report generation
- Centralised transaction logging
- Automated notifications and communication workflows
- Testing, validation, training, and documentation
- Custom BI dashboards beyond standard reporting

5. Functional Requirements

- Submission of travel, accommodation, reimbursements, advances, and expense claims .
- Automated workflow for approvals/rejections with status visibility.
- Integration with Zuna & E-Travel for data synchronization.
- Centralized expense log capturing all transactions.
- Configurable reporting with filters and export options.
- Notifications and alerts for pending/approved/rejected items.
- Role-based access for employees, managers, and finance teams.

6. Non-Functional Requirements

- Usability: User-friendly interface with intuitive navigation.
- Performance: Quick processing of requests and reports.
- Security: Access restricted to authorised users with audit trails.
- Compliance: Alignment with company policies and statutory requirements.
- Reliability: High availability with minimal downtime.

7. System Overview

As part of the project initiation, it is proposed to implement the Travel Management Module and Expense Reimbursement Module as core components of the Expense and Travel Management System.

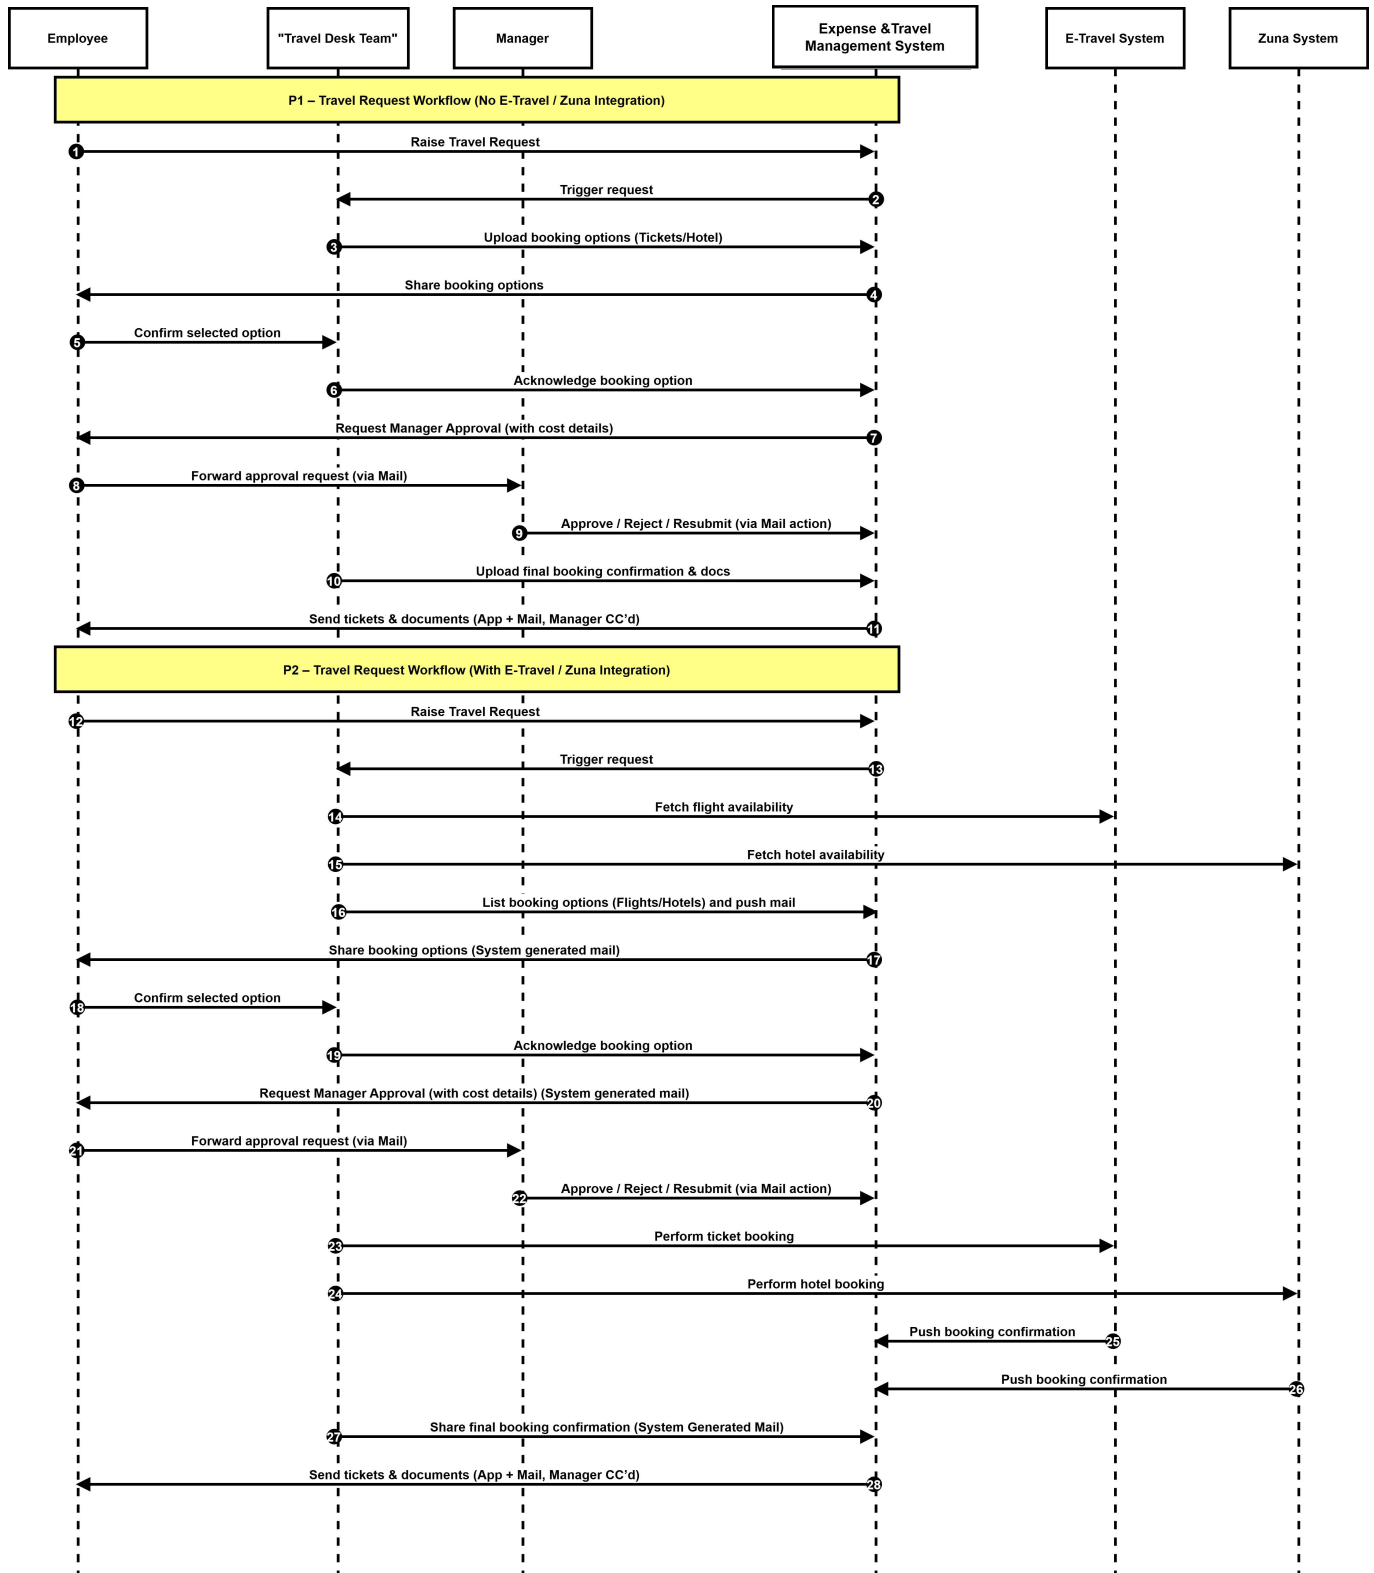

These modules will digitise and standardise the end-to-end travel and expense lifecycle, including request initiation, approvals, expense capture, and reimbursements. The detailed functional scope and system capabilities for each module are illustrated in the diagrams below.

The implementation will focus on:

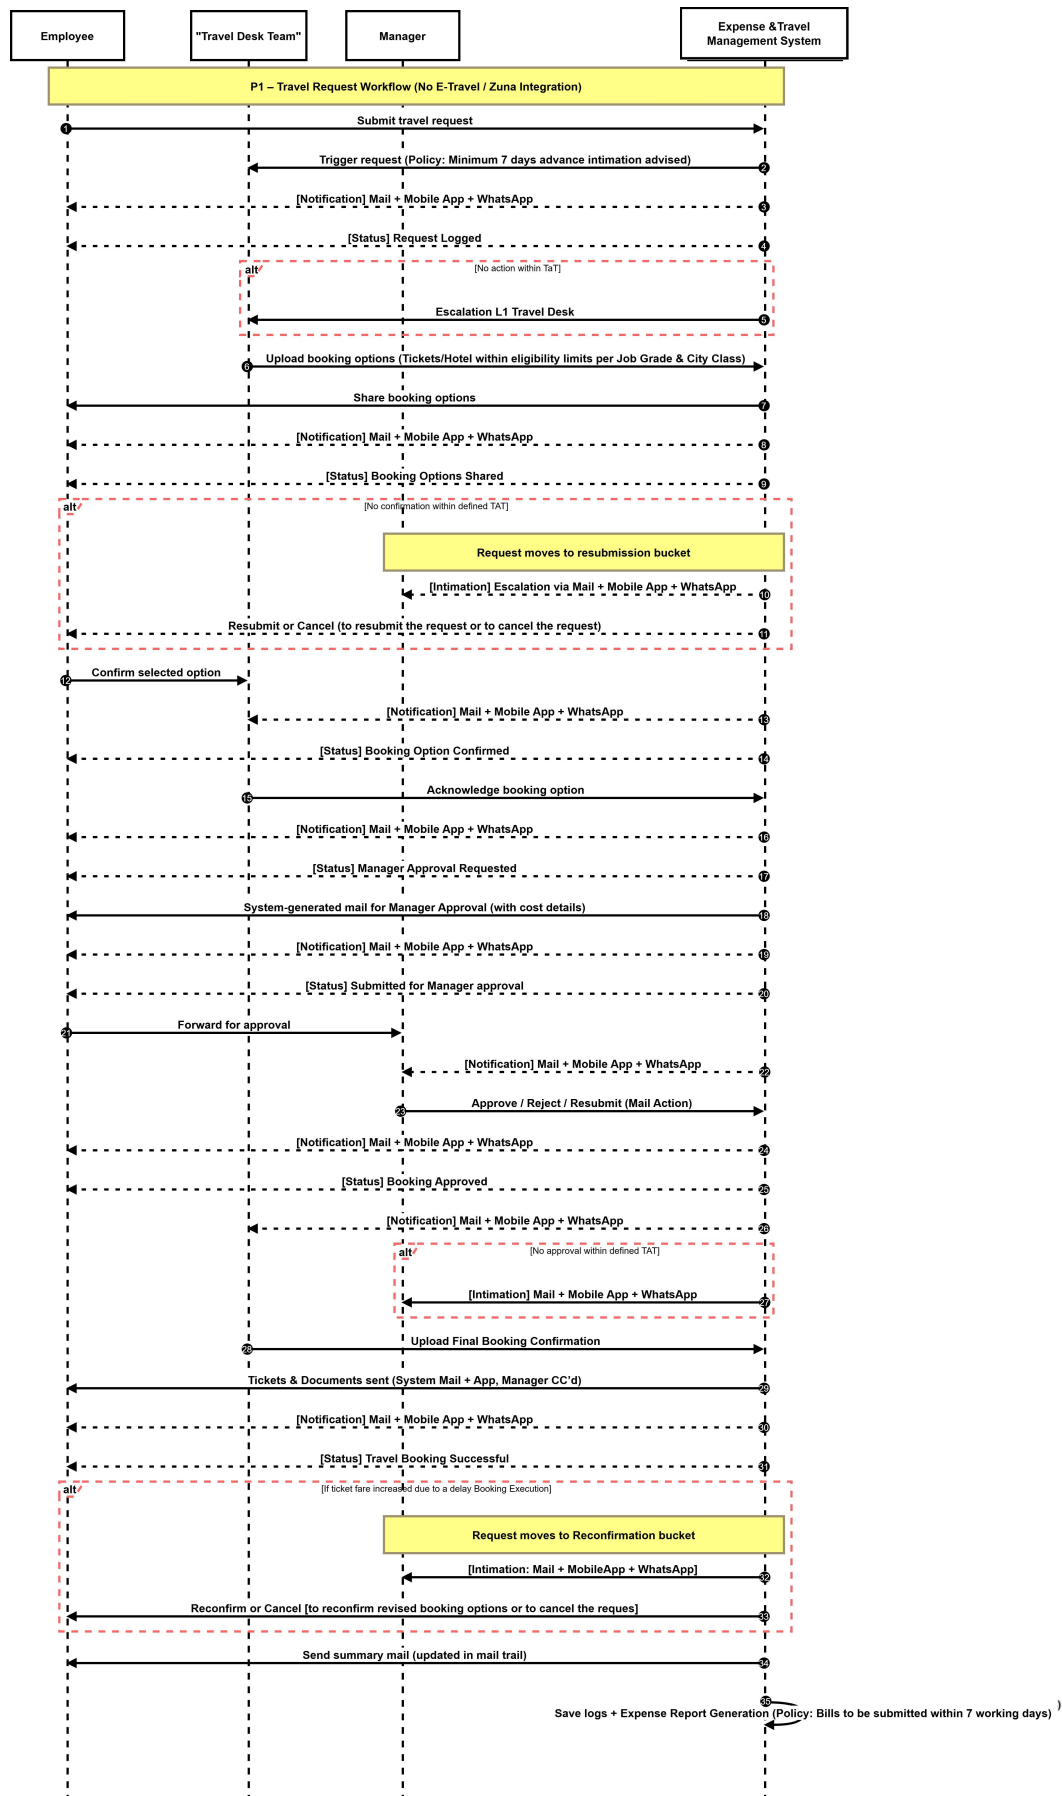

- Configurable workflows for travel requests and expense reimbursements
- Policy-based validations and approval hierarchies
- Centralised tracking of all travel and expense transactions
- Integration readiness with external systems (e.g., E-travel and Zuna) to minimise manual data entry
- Reporting and dashboards for monitoring, compliance, and decision-making.

7.1. Travel and Accommodation:

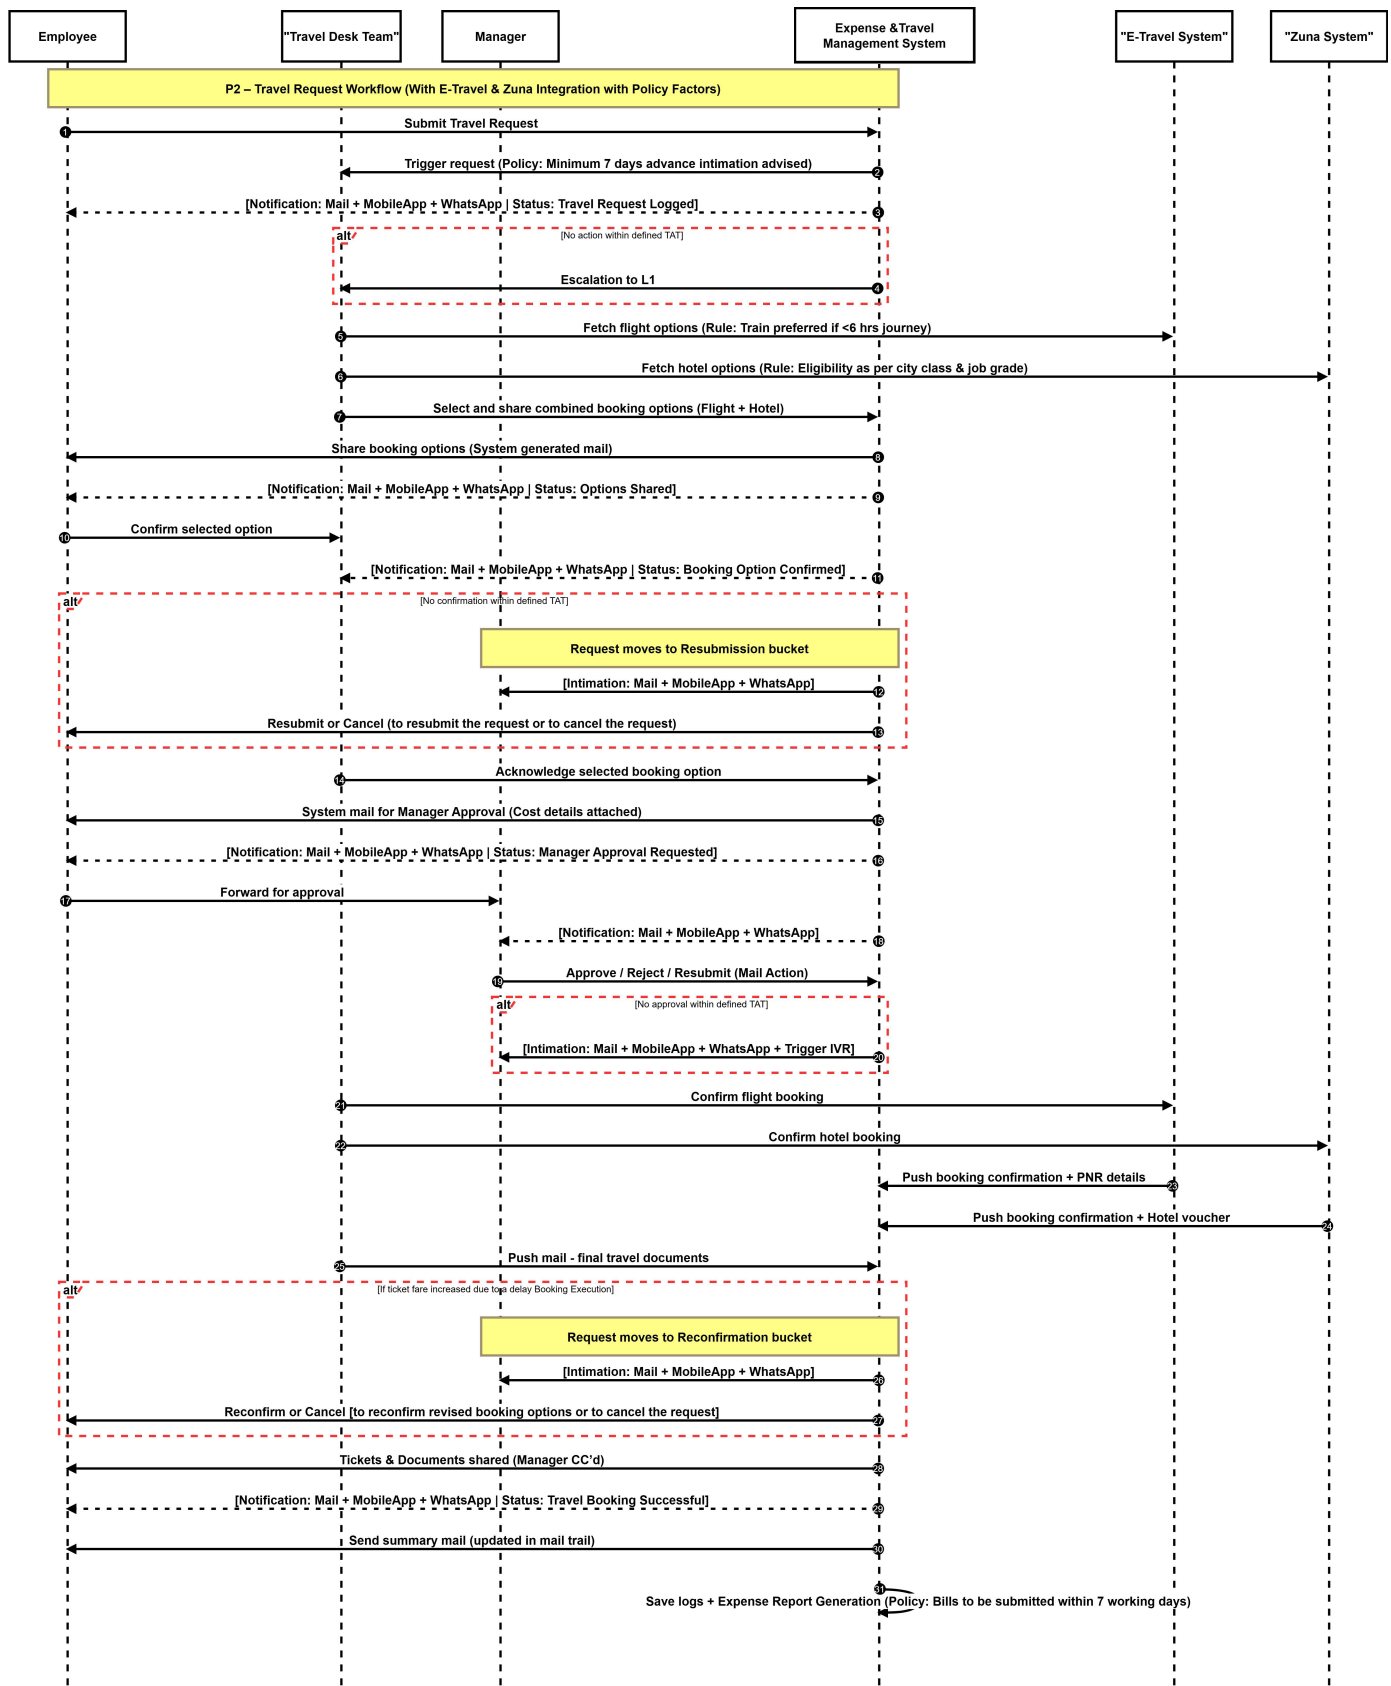

High-Level Design:

Phase 1

Phase 2

Resubmission and Reconfirmation scenario – Travel Request

Resubmission:

If the employee does not confirm the booking option within the defined TAT, the request will be disqualified and moved to the “Resubmission Bucket.” It will be recorded in the log, and the system will prompt the employee to either “Resubmit” or “Cancel” the request.

- If the employee selects “Resubmit,” the request will be raised again with the same initial data as the previous submission.
- If the employee selects “Cancel,” the request will be closed.

After Resubmission,

Travel desk will list and share the ticket options with revised fares.

- **Revised fare (within policy):** If the revised fare remains within the eligible amount as per policy, the system will proceed with the booking.

– Revised (beyond policy):

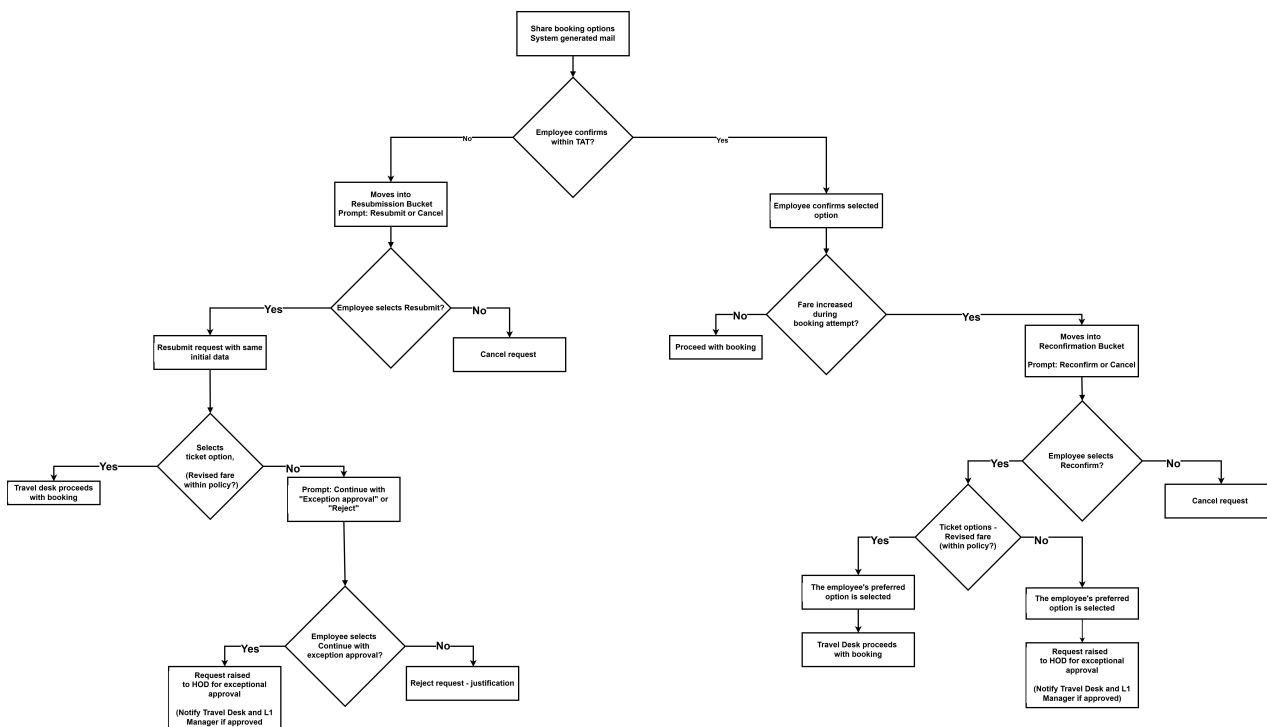

If the revised fare exceeds the policy limit, the employee will be presented with two options: “Continue with exception approval” or “Reject the request.”

- If the employee selects “Continue with exception approval,” the system will raise the request to the HOD for exception approval (with a reason). Once approved, the Travel Desk will be notified to proceed with the booking process, and the L1 manager will be informed of this exceptional approval.
- If the employee selects “Cancel,” the request will be closed.

Reconfirmation

If the employee selects and shares the desired option within the defined TAT, but due to a delay, there is a ticket fare increase when the Travel Desk team attempts to book it, the request will be moved to the “Reconfirmation Bucket.” It will be recorded in the log, the Travel Desk can update and list the ticket options with revised fares, and the system will prompt the employee to either “Reconfirm” any of the revised options or “Cancel” the request (reflecting the updated fare).

- **Revised fare (within policy):** If the employee selects “Reconfirm,” and selects the preferred ticket option and the system will notify the Travel Desk to proceed with the booking process.
- **Revised (beyond policy):** If the employee selects “Reconfirm,” and selects the desired ticket option, the system will raise the request to the HOD for exception approval (with a reason). Once HOD approves, the Travel Desk will be notified to proceed with the booking process and L1 manager will be notified about this exceptional approval.
- If the employee selects “Cancel,” the request will be closed (with comments).

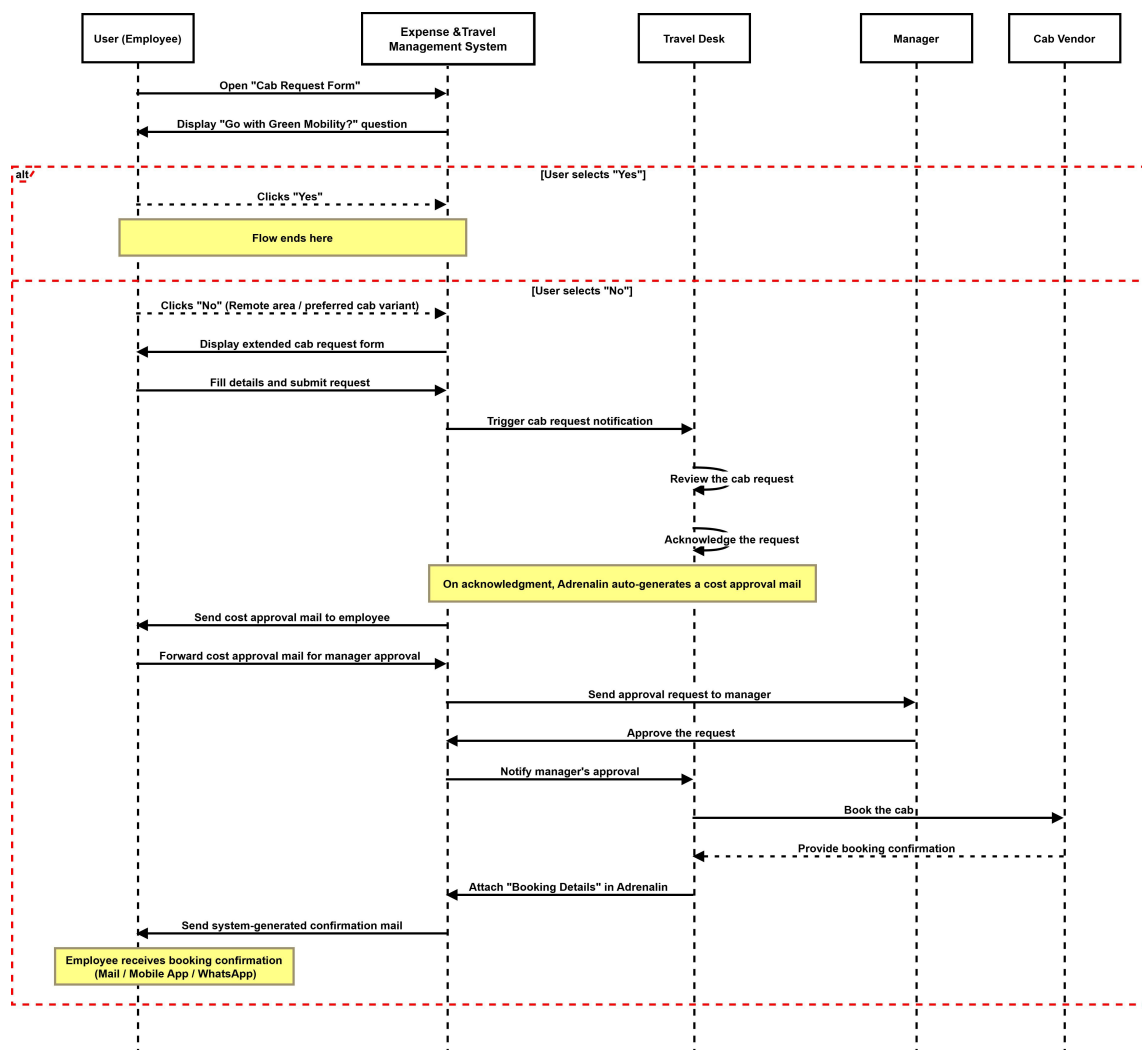

Cab Request:

In the travel request, the Cab Request function in the system has to enable employees to raise cab requirements based on their preferences.

It provides a dropdown — “Go with Green Mobility – Yes / No.”

- Selecting “Yes” closes the request, Green Mobility option is used.
- Selecting “No” activates a detailed cab request form, allowing the employee to submit special travel requirements directly to the Travel Desk.

The function automates request routing, acknowledgement, cost approval generation, and booking confirmation through integrated workflows between the employee, manager, and travel desk, ensuring a seamless and paperless cab booking experience.

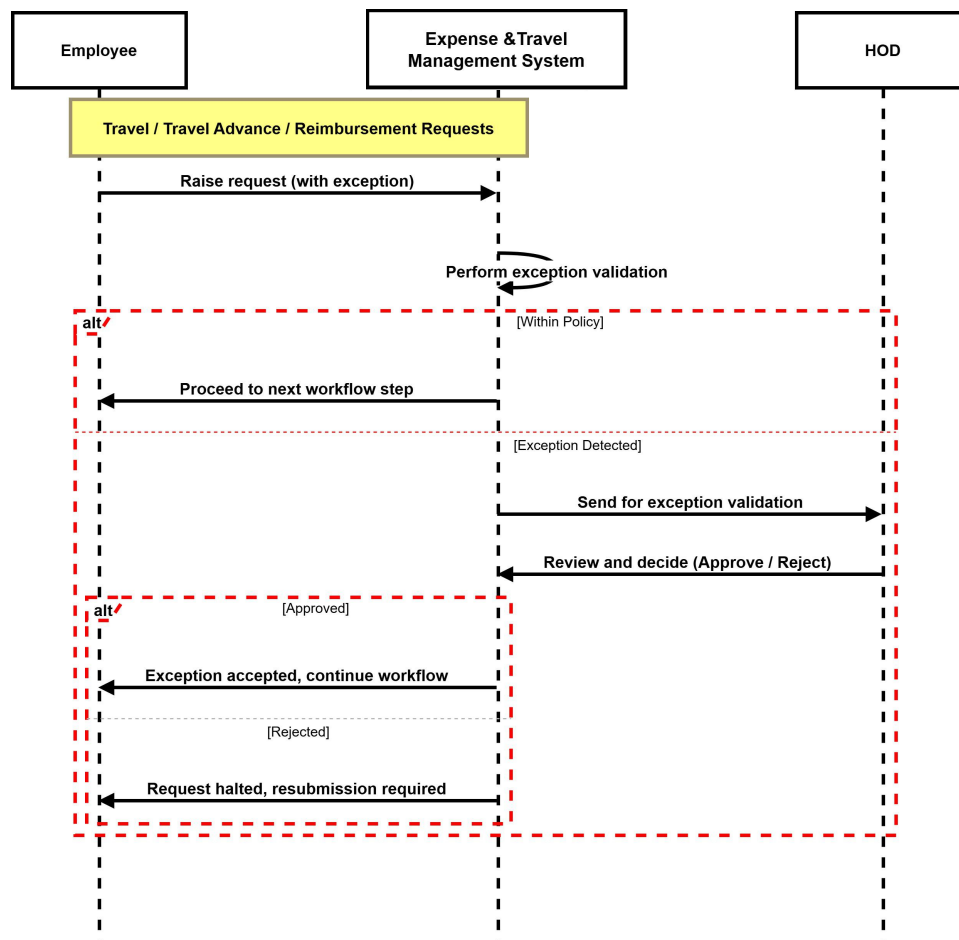

Travel Request - Key Pointers:

- Auto-fetch employee details (Name, ID, Designation, Entity) from HRMS.
- Link designation with travel eligibility and policies.
- Automate "Booking Type" calculation based on travel date vs. booking date.
- Travel request should have "Self / Internal / External" travel request option.
- Include "Exception Workflow" field for policy deviations.
- Sync City Master with E-Travel provider.
- Align E-Travel and Zuna masters within Refex Expense Management System.
- Zuna to manage hotel details, policy configuration, and master data.
- Regular sync of employee master (active/exit) between HRMS and Zuna.
- Periodic sync of policy and employee data between Refex Expense Management System and Zuna.
- Green Mobility team to manage pickup/drop requests; Travel Desk to handle exceptions (for remote and cab type preferences).
- Define travel eligibility (Air/Bus/Train) based on designation.
- Include "Exception Box" for deviation routing to HOD for approval.
- Auto-populate bank account details from payroll (TBF).
- Make Travel Request ID reference mandatory for both advance and claim.
- Include a mandatory currency conversion function in relevant form fields.

- Standardize email templates for requests, approvals, and escalations.
- Use the Mobile App and WhatsApp for notifications.
- Implement SLA monitoring for TAT breaches.
- Move delayed travel requests to “Resubmission Bucket.”
- MIS to capture resubmission count, department/employee data, and cost escalation.
- Develop Power BI dashboards for travel and expense analytics.
- Include in dashboards: resubmission count, escalation trends, cost impact, and department-wise expenditure.
- This should support to enable Power BI-based Expense dashboards with MIS reporting. This enhancement is planned for a subsequent release.

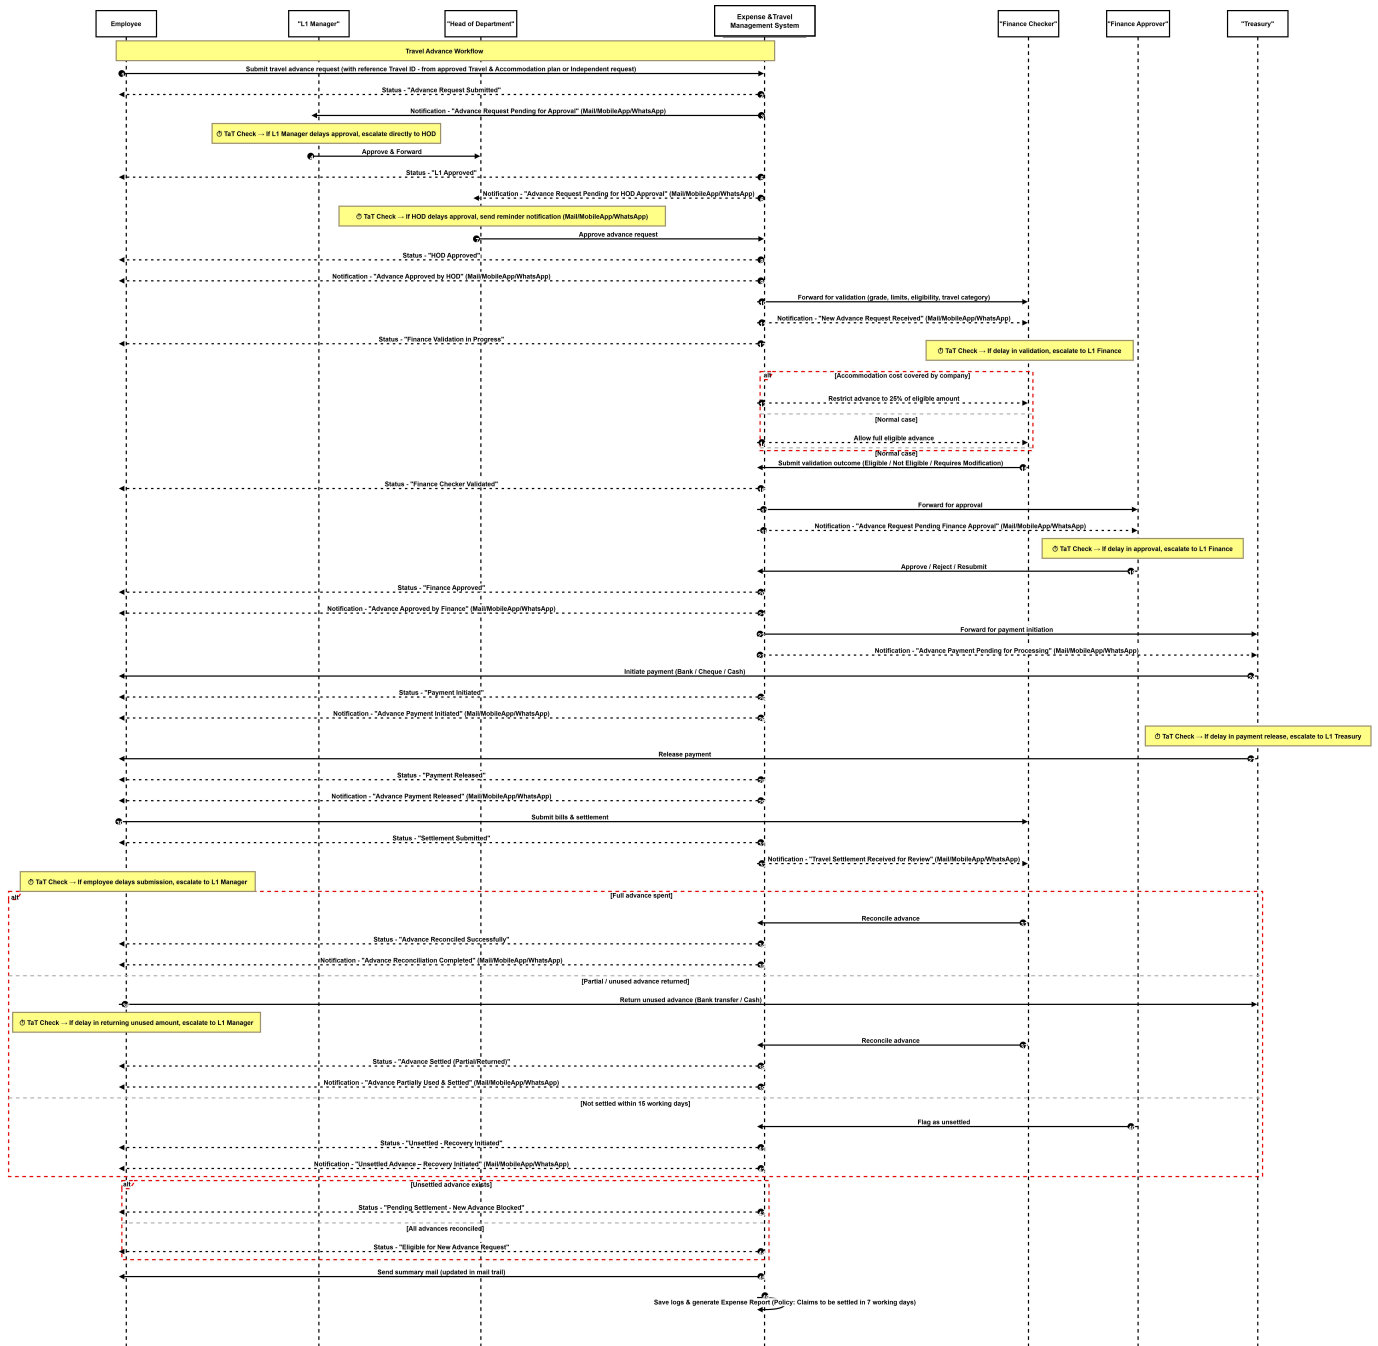

Exception case handling:

When an employee fills a form to submit the request, such as travel, travel advance, or reimbursement. the system performs an exception validation check. If the request complies with policy, it proceeds through the normal workflow. However, if a policy breach is detected, the system prompts the employee to select the exception checkbox and provide a justification. Once submitted, the request is routed to the Head of Department (HOD) for review. The HOD evaluates the justification and either approves the exception, allowing the request to proceed, or rejects it, requiring the employee to revise and resubmit. This process ensures that all exceptions are properly controlled, reviewed, and validated early in the workflow, maintaining policy compliance.

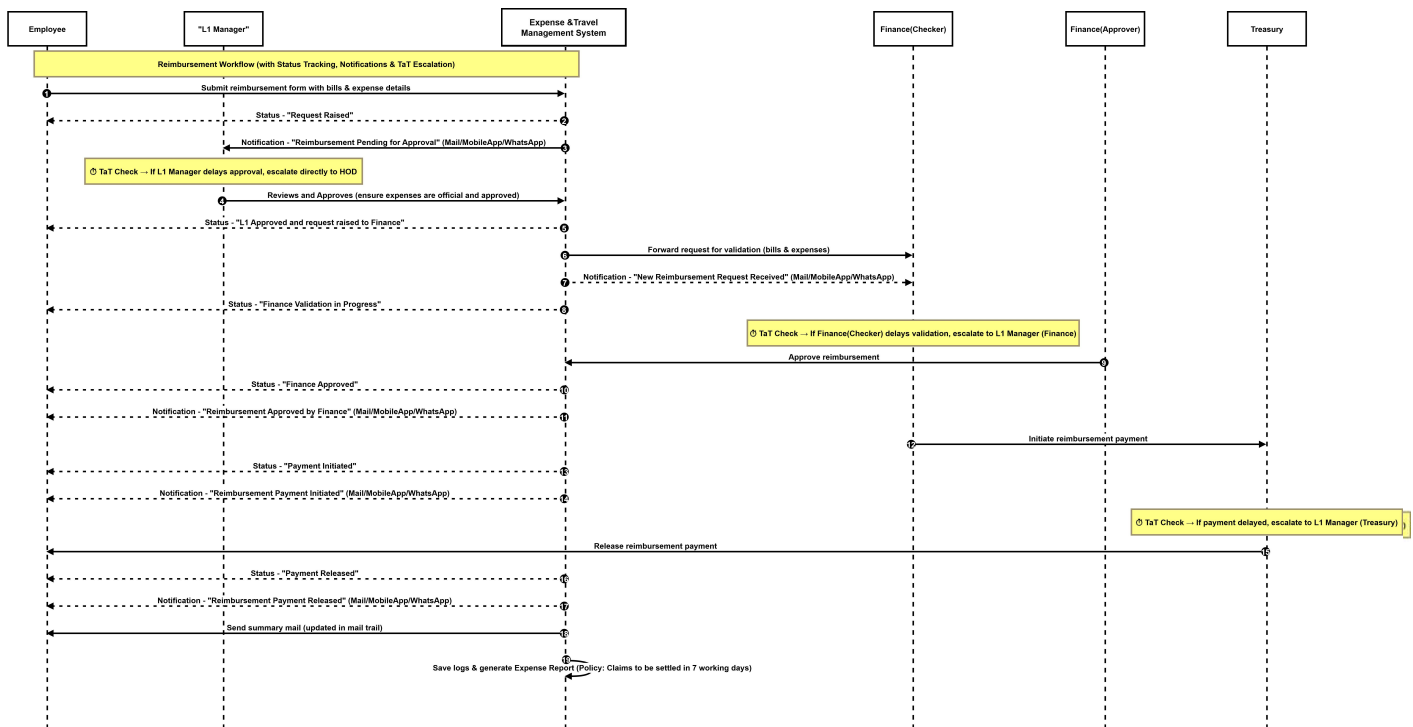

7.2. Finance Requests:

Travel Advance Request

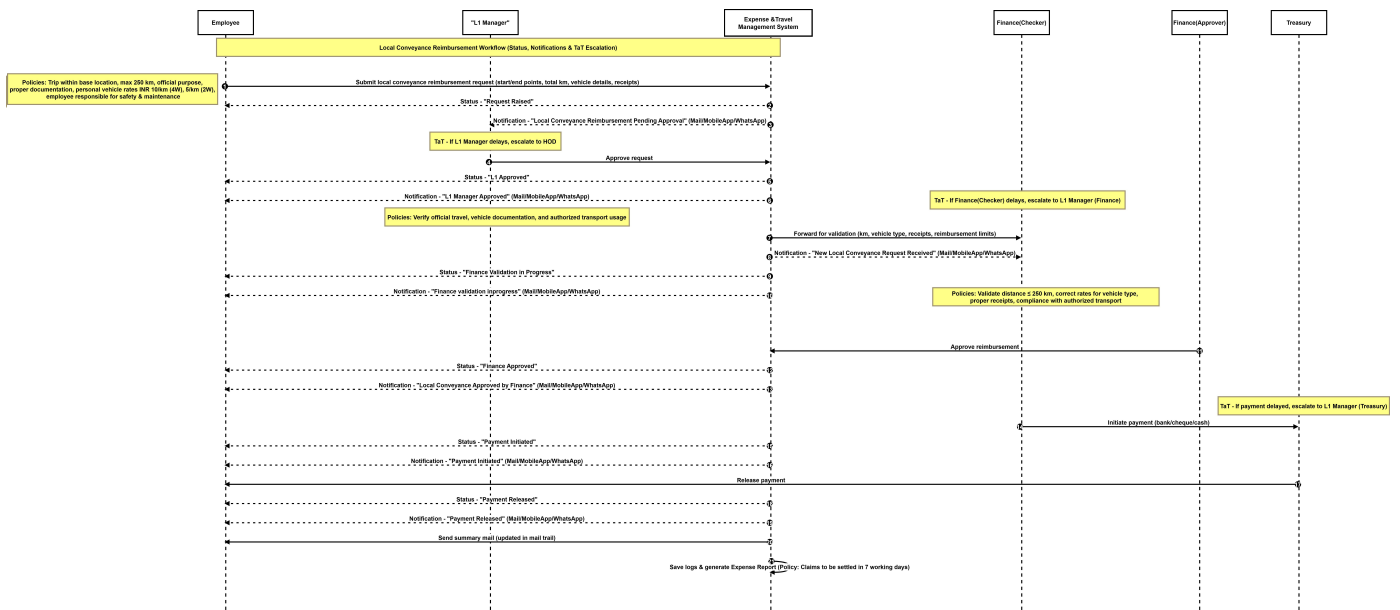

Reimbursement Request:

Finance requests - Key pointers :

- The upload option in the mobile app should provide a camera option for easy document capture.
- Forms should include an autosave feature to prevent data loss.
- Policy change control must be maintained. For example, if a request is raised today for reimbursement of bills dated October 5, the system should process the reimbursement according to the policy effective before October 5.
- The system should ensure consistent version control to support accurate policy enforcement.
- Every approval request should include "Approve," "Reject," and "Resubmit" buttons.
- The number of resubmissions and rejections by a user must be captured and included in the final email summary and reports.
- Employees should receive a document confirming the reimbursement credited to their salary account, which can serve as reference evidence for income tax purposes. This is considered a best practice for the application.

Local Conveyance:

8. Form Factor & Validations (Workflow)

Travel Request form :

Form Name	Field Name	Field Type	Note
Travel Request Form	Employee Details	Text (Auto-fetched)	Auto fetched from Basic Info.
	Purpose	Text	
	Type	Dropdown (Domestic / International)	
	Beneficiary	Dropdown (Self/Internal/External)	When a user raises a request for their colleague or an external resource.
Itinerary Form	Trip Type	Dropdown (One-way / Round-trip)	
	Source	Dropdown	Pre-defined list (sync with E-Travel provider)
	Destination	Dropdown	
	Travel Dates	Date Range	
	Booking type	Automatic field (Prior to (x) day(s) / Adhoc booking)	Based on the Travel dates, this has to be automatically shown (Policy)
	Mode	Dropdown (Air / Bus / Train)	Only an eligible user can select "Air" option.
	Exception	Checkbox	If a G1 or G2 candidate wants to select "Air",

Form Name	Field Name	Field Type	Note
			they have to check this checkbox. (Policy deviation)
	Exception Approval	Text box	The candidate has to input the reason and submit it for HOD approval to proceed further. (This applies to any policy deviation in all forms)
Accommodation Request Form	City	Dropdown	
	Location	Dropdown	sync with Zuna
	Check-in Date	Date picker	
	Check-out Date	Date	
Cab request Form	Go with "Green mobility"	Dropdown (Y/N)	If "Yes", No action. If "No", cab request form appears
	Pickup Mode	Dropdown	Auto/Cab (sedan/xuv)
	Pickup Location	Lat & Long field	
	Pickup Time	Time	
	Drop Location	Lat & Long field	
	Drop Time	Time	
	Additional Notes	Text Area	
Advance Request Form	Purpose	Text	
	Amount	Number Picker	
	Payment Mode	Dropdown (Bank, Cheque, In-person payment)	A checkbox has to be added "Hard Currency issued" (Travel Desk action)
	Settlement Date	Date picker	
	Payment Mode	Dropdown (Cash / Transfer / In-person)	

Inputs from Travel Desk team (During Execution):

Form Name	Field Name	Field Type	Note
Travel Request Tab	Upload Booking options	Attachment field	To attach the booking options and push mail (Phase 1)
	Cost Impact	Drop down (Early Booking Savings/Late Booking Cost)	Input field in Phase 1, Auto-fetched in Phase 2
	Value	Number Picker	

Advance Payback form:

Form Name	Field Name	Field Type	Note
Advance payback form	Travel ID	Search bar	To search the Travel ID
	Purpose	Input field	Description of each bill
	Amount	Number Picker	Corresponding amount of each purpose
	Bill	Attachment	To attach the corresponding bill
	Total Advance	Auto fetched	
	Payback Value	Auto calculated	The system has to auto calculate the difference
	Payment mode	Dropdown	(Bank/Cash)

Reimbursement form:

Form Name	Field Name	Field Type	Note
Reimbursement form (Common fields)	Request Type	Dropdown	Travel expense, Local Conveyance (Cab, Auto, Own vehicle), Fuel expense, Lodging expense, Laundry expense
	Travel Type	Drop down (Planned Travel / Independent)	(for Travel expense)
	Travel ID	Search bar	To search the Travel ID (in case of planned travel)
	Expense summary (A table with fields - Purpose, Amount, Bill)	Web table	A table with a description of each expense, with the corresponding amount and the bill

	Note	Text input box	To add additional comments
Local Conveyance	Type	Dropdown	Cab/ Auto /Own vehicle
	Vehicle type	Dropdown	Two / Four-wheeler (if own vehicle)
	Vehicle Number	Alphanumeric	If own vehicle (for validating authorized vehicle)
	Source	Text	
	Destination	Text	
	Distance	Auto calculated	Based on maps
	Rate	Auto calculated	Based on previous inputs and policy document (for own vehicle)
Food	Travel Purpose	Dropdown	(Official Travel / Business Trip)
	Travel Dates	Date picker	
	Declaration of No Bills Available	Dropdown	(Yes/No) if applicable, to claim 50% reimbursement
	Breakdown of Expenses	Web table	(Date, Meal Type - Breakfast/Lunch/Dinner, Amount) in multiple legs
Lodging	Travel Purpose	Dropdown (Official Travel / Business Trip)	
	Travel date	Date picker	
	Location	Lat and Long	
	Check in / out dates	Date picker	

9. Masters

Employee & Org Masters

- Employee Master (ID, Name, Designation, OU, Contact number, Organisation E-mail ID, Status – Active/Exit)
- Manager & HOD Mapping
- Department & Cost Center Master
- Bank Account Master (auto-fetched from Payroll – TBF)

Policy & Eligibility Masters

- Travel Policy Master (Domestic / International)

- Travel Eligibility by Designation (Air / Train / Bus)
- Booking Type Rules (Advance vs Adhoc)
- Expense Policy Version Master (effective date-based)

Operational Masters

- City & Location Master (syncd with E-Travel)
- Hotel & Accommodation Master (managed via Zuna , MMT)
- Vehicle & Conveyance Rate Master
- Currency & Conversion Rate Master

10. Modules

Core Modules

- Travel Request Management (Ticket Booking, Accommodation, Cab, Travel Advance)
- Ticket Booking (Air / Bus / Train)
- Accommodation Request (Linked to travel with travel ID)
- Cab Request (Taxi, Auto, RAC, Green Mobility Request) (Both Local / Out of station)
- Travel Advance Management (Linked to travel with travel ID)
- Reimbursement Management (Travel, Food, Fuel, Lodging, Local Conveyance)
- Advance Payback / Settlement

Support Modules

- Exception Handling & Approval
- SLA, Escalation & TAT Tracking
- Notification & Communication Engine
- MIS & Reporting
- Audit Log & Transaction History

11.RBAC (Role-Based Access Control)

Employee

- Raise travel, advance, reimbursement requests
- Upload bills, confirm bookings, resubmit/cancel requests
- View request status & history

Manager (L1)

- Approve / Reject / Resubmit requests
- View team-level expenses
- Receive SLA escalation alerts

HOD

- Approve policy exception cases
- Handle escalations beyond L1
- View Department -level expenses

Travel Desk

- Provide booking options
- Execute bookings
- Manage reconfirmation & resubmission buckets

Finance Team

- Validate reimbursements & advances
- Process payments
- Manage settlements & compliance checks

Admin

- Master data configuration
- Policy setup
- Reporting & audit access

12. Hierarchy

Approval Hierarchy

- Employee → Manager (L1) → Travel Desk / Finance
- Policy Exception: Employee → HOD
- Finance Escalations: Finance L1 → Finance Manager

Operational Hierarchy

- Travel Desk L1 → Travel Desk L2
- Finance Validator → Treasury / Payment Team

13. Data integration points

Refex Expense Management System

- Employee master
- Payroll & bank details
- Designation & reporting hierarchy

Zuna

- Hotel master data
- Accommodation policies
- Policy configuration sync

E-Travel System

- City & travel inventory
- Booking options & fare details

Maps & Location Services

- Distance calculation
- Lat/Long validation for conveyance

BI / Power BI (Phase 2)

- Expense analytics dashboards
- Cost escalation & resubmission trends

14. User Journey

Travel Request

- Employee raises travel request
- Policy validation (eligibility, booking type)
- Manager approval
- Travel Desk shares booking options
- Employee confirms → booking executed
- Reconfirmation / Resubmission if fare changes or SLA breach

Finance Requests

- Advance → Approval → Disbursement → Settlement
- Reimbursement → Approval → Finance validation → Payment

Exception Flow

- Policy breach detected
- Employee submits justification
- Routed to HOD for approval

Approved → normal flow | Rejected → resubmission

15. Data Model & Data Governance

Core Entities

- Travel Request
- Advance Request
- Reimbursement Request
- Expense Line Items
- Approval Logs
- Policy Version Reference
- SLA & Escalation Records

Governance Controls

- Policy version locking (policy as-of transaction date)
- Immutable audit logs for approvals & changes
- Mandatory Travel ID reference for advances & claims
- Resubmission & rejection count tracking

16. Escalation Matrix and TaT

Travel and Accommodation Request :

Escalation Trigger	Team	TaT	Escalation Recipient	Communication Channel	Action / Notes
Travel request raised but no action by Travel Desk	Travel Desk	5 mins	Travel Desk L1	Mail + MobileApp + WhatsApp	Notify Travel Desk to take action
Travel request still not acted upon	Travel Desk	5 mins	Travel Desk L2	Mail + MobileApp + WhatsApp	Escalate to next level
Employee delays confirming booking options	Concern Team	5 mins	Employee	Mail + MobileApp + WhatsApp	Notify employee to confirm booking
Manager delay approving booking	Concern Team	10 mins	Manager	IVR + Mail + MobileApp + WhatsApp	Escalate to ensure approval
Booking not confirmed after approval	Travel Desk	5 mins	Travel Desk L1	Mail + MobileApp + WhatsApp	Notify Travel Desk to finalise booking
Booking still not finalized	Travel Desk	5 mins	Travel Desk L2	Mail + MobileApp + WhatsApp	Escalate to next Travel Desk level

Finance requests:

Finance Requests (Travel Advance, Reimbursement - Local Conveyance, Food, Fuel, Lodging)

Escalation Trigger	Team	TaT	Escalation Recipient	Communication Channel	Action / Notes
L1 Manager delays approval	Concern Team	1 day	HOD	Mail + MobileApp + WhatsApp	Escalate to ensure approval
HOD delays Approval	Concern Team	1 day	Self	Mail + MobileApp + WhatsApp	Intimation to approve
Finance delays validation,	Finance Team	3 days	L1 Manager (Finance)	Mail + MobileApp + WhatsApp	Escalate to ensure approval

Finance delays payment	Finance Team / Treasury	1 day	L1 Manager (Finance)	Mail + MobileApp + WhatsApp	Escalate to ensure approval
------------------------	-------------------------	-------	----------------------	-----------------------------	-----------------------------

17. Sample Mail Template

Travel and Accommodation Request:

Escalation Trigger	Level	Sample Mail Template
Travel request raised but no action by Travel Desk	L1	The listed travel requests (Travel ID: [insert ID]) raised on [time stamp] are still not acted upon by the Travel Desk. Requesting your intervention to expedite. (Summarised mail)
Travel request still not acted upon	L2	The listed travel requests (Travel ID: [insert ID]) raised on [time stamp] remain unaddressed by the Travel Desk despite earlier follow-up. Requesting your intervention to expedite.
Employee delays confirming booking options	L1	Travel ID [insert ID] (Timestamp: [insert timestamp]) for [Employee Name] is still not confirmed. Requesting your intervention.
Manager delay approving booking	System	Travel ID [insert ID] (Timestamp: [insert timestamp]) is still pending your approval. Requesting your intervention to expedite.
Booking not acknowledged after approval	L1	The list of travel requests Travel ID [insert ID] (Timestamp: [insert timestamp]) has been approved but not yet acknowledged. Requesting your intervention to expedite. (Summarised mail)
Booking still not acknowledged	L2	The list of travel requests (Travel ID [insert ID] (Timestamp: [insert timestamp]) are still not acknowledged. Requesting your intervention to expedite. (Summarised mail)

Advance Request:

Escalation Trigger	Level	Sample Mail Template
Travel Advance request submitted but L1 Manager has not approved	HOD	Travel Advance request (Travel ID: [Travel ID]) submitted on [Timestamp] by [Employee Name] is pending L1 Manager approval beyond the allowed TaT. Requesting your intervention to expedite.
HOD delays approval for Travel Advance	Self	Travel Advance request (Travel ID: [Travel ID]) submitted by [Employee Name] on [Timestamp] is pending HOD approval beyond the allowed TaT. Kindly take immediate action.
Finance delays validating Reimbursement	L1 (Finance)	Travel Advance request (Travel ID: [Travel ID]) submitted by [Employee Name] on [Timestamp] is pending Finance validation beyond the allowed TaT. Requesting intervention for timely processing.
Finance delays releasing the Advance payment	L1 (Finance)	Travel Advance (Travel ID: [Travel ID]) for [Employee Name] approved but payment not released beyond allowed TaT. Requesting intervention to expedite payment.
Employee delays submitting bills / returning unused Travel Advance	L1	Travel Advance (Travel ID: [Travel ID]) for [Employee Name] is pending settlement beyond the allowed TaT. Requesting your intervention to follow up.

Reimbursement Request:

Escalation Trigger	Level	Sample Mail Template
Request submitted but L1 Manager has not approved	HOD	Reimbursement request (Expense Type: [Travel/Food/Local Conveyance], Request ID: [Request ID]) submitted by [Employee Name] on [Timestamp] is pending L1 Manager approval. Requesting your intervention to expedite.
HOD delays approval for Reimbursement	Self	Reimbursement request (Request ID: [Request ID]) submitted by [Employee Name] on [Timestamp] is pending HOD approval beyond allowed TaT. Kindly take immediate action.
Finance delays validating Reimbursement	L1	Reimbursement request (Request ID: [Request ID], Employee: [Employee Name]) submitted on [Timestamp] is pending Finance validation beyond allowed TaT. Requesting intervention for timely processing.
Finance delays releasing the Reimbursement payment	L1	Reimbursement request (Request ID: [Request ID], Employee: [Employee Name]) approved but payment not released beyond allowed TaT. Requesting intervention to expedite payment.

18. Report

Travel and Advance report format:

Travel and
Accommodation - Repo

Advance and reimbursement report format :

Advance &
Reimbursements -Ref

19. Policy document:

Refex domestic
policy.pdf

20. Approval Matrix

Expense Type	Approval Authority	Remarks
Travel Request	Manager → Travel Desk	Must align with travel policy
Accommodation	Manager → Travel Desk	Linked to approved travel

Reimbursements	Manager → Finance	Policy-based, CXO approval required
Advances	Manager → Finance	Settlement within period
Exception Cases	HOD	Policy exception cases

21. Communication Matrix

Communication Type	Stakeholders	Channel	Frequency	Purpose
Expense Reimbursements	Employee, Finance	Email, Mobile App & WhatsApp	Real-time	Notify new submission
Approval/Rejection Alerts	Manager, Employee	Email, Mobile App & WhatsApp	Real-time	Workflow progression
Escalation Notifications	Escalation Authority	Email, Mobile App & WhatsApp	As required	SLA adherence
Monthly Expense Reports	Admin, Finance, CXO	Email, Mobile App & WhatsApp (if req.)	Monthly	Financial visibility
Training & Updates	All End-Users	Email, Web app and Mobile App	Quarterly	Adoption & compliance

22. Security, Privacy & Compliance

Security

- Role-based access control
- Approval segregation (Employee ≠ Approver ≠ Payer)
- Secure document uploads

Privacy

- Restricted visibility of financial & bank details
- Employee-specific data isolation
- Controlled access to reports

Compliance

- Policy-driven validations
- Exception approvals logged

- Statutory compliance support (IT reimbursement proof)
- Full audit trail for internal & external audits

23. Stakeholders & Approvals

No.	Stakeholder	Designation	Team	Approval Status
1	Suhail Shariff	Vice President	Admin - Refex	
2	Srivaths Varadharajan	Chief Technology Officer	IT - Refex	
3	Rajlaxmi Sumesh	Assistant General Manager	DT - Refex	
4	Gowtham S	Senior Manager	IT - Refex	
5	Sonal Jain	Senior Manager	Finance & Accounts
